Námsgögn: <i>Total English Advanced, Lord of the Flies William Golding, Across the Barricades</i> Joan Lingard, stories, dictionary.

Lýsing: ENSK3FA05 is an advanced study of the English language. A special emphasis will be placed on gaining confidence and skill at academic and professional conversation as well as improving fluency in colloquial English. Reading comprehension will increase in breadth and depth through exposure to texts from a variety of fields, including the sciences and social sciences as well as the arts, literature and journalism. A variety of written assignments will improve and enlarge the student's facility with written English.

Markmið: Class will be conducted entirely in English. A typical class period will include: close reading of the text; classroom discussion; group activities focused on vocabulary building and points of grammar. It is important that students do the assigned reading before they come to class so that they are prepared to participate in class discussion.
